- Cleans into fabrics and furnishings
- Stops mould and fungi growth
- Treat multiple areas with a single unit
- No chemical residue or moisture after treatment
- Area can be put back to full use within minutes
- Low maintenance, clean and lamp change once a year

› ODOUR PROBLEMS

Unpleasant lingering odours can leave some rooms unusable or create a negative impression which affects your company image and customer feedback. Attempting to mask odours with fragrances can make the area even more unpleasant.

Many odours are created from microorganisms, musty odours can indicate mould whereas unpleasant stale odours may be a warning sign of high levels of bacteria. Traditional cleaning and disinfecting will not eliminate odours, you cannot clean the air itself and even simple odours from food, illness or smoke can remain in an area for days if untreated. Methods such as fogging can increase damp issues or leave chemical residues, often meaning areas cannot be occupied for several hours.

Guideline Treatment Times To Clear	20m2
Body odour / stale air	15 minutes
Mild smoke odours / food odours	30 minutes
Sickness odours / incontinence odours	1 hour
Strong persistent odours*	4 hours+

*Odours engrained in fabrics/furnishing will require longer or repeated treatments to clear. Contact us for a specific guide.

› BENEFITS OF USING AIRSTERIL MP100

- › Rapidly clear embarrassing odours from smoke, food, illness, incontinence, damp and mould
- › Perfect for a wide variety of unoccupied areas
- › Hotels - bedrooms, conference rooms
- › Offices - meeting rooms, break room, cafeteria
